

POPULATION MOBILITY AND LABOUR MARKETS

This project will improve remote Aboriginal and Torres Strait Islander people's social, health and economic opportunities by improving their access to services and markets. An evidence base will be developed to allow policy-makers to move away from the view that mobility works against economic participation and towards a view in which mobility is understood and accommodated.

ECONOMIC
PARTICIPATION

www.crc-rep.com.au

THE COOPERATIVE RESEARCH CENTRE FOR REMOTE ECONOMIC PARTICIPATION IS A RESEARCH CENTRE DELIVERING SOLUTIONS TO ECONOMIC DISADVANTAGE IN REMOTE AUSTRALIA.

POPULATION MOBILITY AND LABOUR MARKETS IS PART OF THE CRC-REP'S REGIONAL ECONOMIES RESEARCH PROGRAM.

PROJECT IMPACTS

- New livelihood opportunities for Aboriginal and Torres Strait Islander researchers trained in the project.
- Delivery of more efficient and effective services to communities and individuals.
- Improved basis for enumerating Aboriginal and Torres Strait Islander people in remote areas which in turn will lead to:
 - strengthening of current and emerging remote communities through the delivery of more cost effective services that reflect patterns of mobility
 - identification of the impact of service delivery breakdown on mobility patterns, thereby reducing overcrowding and leading to lower repairs and maintenance costs
 - service providers and employers understanding the impact of policy change and local agency on mobility patterns, thereby making savings through better targeting of services.
